

**FSG's LAW ENFORCEMENT MANAGEMENT SYSTEM (FSG/LEMS)**  
**Property File**

The property module encompasses stolen/recovered/evidence/damaged/found property. Information is automatically updated from the incident report program, or can be entered manually. The property module provides the information necessary to control, track and report on all property within the department.

**SYSTEM HIGHLIGHTS:**

- Tracks stolen, recovered, damaged, evidence, found property
- Fully name oriented.
- Tracks property movement, thereby ensuring proper "chain of evidence."
- The following inquiries are available:
  - View by Incident Number
  - View by Victim Name
  - View by Date Reported
  - View by Serial Number
  - View by Type of Property
  - View by Class of Property
  - View by Search Word
  - View by Badge Number
  - View Property Movements by Name
  - View Property Movements by Inc#
- The following reports are available:
  - Property File List - Detailed
  - Property Valuation Report
  - Property Inventory Worksheet
  - Property Inventory Report
  - Property File List - Brief
  - Property Return Form
  - Property Review Report
  - Chain of Evidence Report
  - Print Property by Incident Number
- Provides stolen/recovered property valuation report.
- Provides selective reporting on stolen/recovered property.
- Fully interfaced to Incident Report and Master Name modules.
- Includes pawn shop tracking and NSF check tracking
